

CAPABILITY STATEMENT

INNOVATE. TRANSFORM. SECURE.

HemRang Solutions Inc. is SWaM-certified, women owned small business delivering secure, scalable technology and product engineering solutions to federal, state, and commercial organizations. We help organizations modernize legacy systems, accelerate digital transformation, build innovative products, and adopt AI through Generative AI, Cloud Modernization, Zero Trust Security, AI Governance, and Software Engineering.

Our team brings deep expertise in enterprise architecture and mission-critical technology to design, build, modernize, and secure AI-powered products and digital platforms that deliver measurable mission and business outcomes.

COMPANY INFO & CERTIFICATIONS

-  Unique Entity ID: NZLRHBD9CQJ5
-  DUNS ID: 01-593-1195
-  CAGE Code: 9VR00
-  SWaM certified
-  SBA 8(a) – applicant
-  Women Owned Small Business (WOSB)

CORE COMPETENCIES

AI Governance & Responsible AI

HemRang helps organizations govern, secure, and scale AI responsibly through practical AI governance frameworks, NIST AI RMF alignment, risk and model management, security and privacy controls, AI policies, and lifecycle oversight. We enable transparent, compliant, auditable, and trustworthy AI from development through deployment and operations.

Architecture, Engineering & Full-Stack Technology Consultancy

From strategy to execution, HemRang delivers end-to-end consulting across enterprise architecture, Generative AI, cloud, cybersecurity, DevSecOps, and full-stack software engineering. We architect, build, modernize, and secure intelligent digital solutions using AI-first, cloud-native, and security-by-design principles to accelerate mission and business outcomes.

Business Transformation & Modernization Services

HemRang helps organizations modernize legacy environments, streamline operations, and accelerate digital transformation through Generative AI, cloud modernization, Zero Trust, AI governance, and modern software engineering. We combine strategy, architecture, and engineering to deliver secure, scalable, and intelligent solutions that turn ideas into measurable mission and business outcomes.

Zero Trust Security

HemRang delivers Zero Trust architectures that secure identities, data, applications, and AI workloads using ZTNA, ABAC, Policy-as-Code, and continuous monitoring. We strengthen cyber defense, unmask insider threats, ensure trust respons—aligned with NIST SP 800-207 and federal cybersecurity requirements.

DIFFERENTIATOR

Client-Centric Delivery Model.

We embed ourselves as trusted advisors aligning technology decisions with client missions, business objectives, and operational realities.

Innovation with Purpose

We apply emerging technologies (GenAI, AI/ML, cloud-native, automation) only where they deliver measurable value, reducing risk, accelerating outcomes.

End-to-End Modernization Expertise

From strategy and architecture to implementation and optimization, we own the full lifecycle.

Security & Compliance Built In

Cybersecurity, Zero-Trust, resilience, and governance are integrated from day one—not bolted on later.

Agile, Scalable, Outcome-Driven

Our lean teams adapt quickly, deliver iteratively, and focus on results that matter.

PAST PERFORMANCE & TEAMING

HemRang has worked with Federal agencies for 5+ years providing our core capabilities

Internal Revenue Service

United States Postal Service

U.S. Department of Veterans Affairs

IT Modernization Solutions

A Division of Applica Solutions, Inc.

We are an ideal partner for joint ventures, subcontracting, and teaming opportunities on federal, state, and commercial programs.
